

SEMINAR
Gas in flats and other multi-dwelling buildings
IGE/G/5

Objectives of the Seminar

To explain the philosophy of IGE/G/5, develop understanding of how it should be applied in a variety of situations and to assist with undertaking the important risk assessments and applying these to potential installations.

The experts who wrote the Procedures will use case histories to demonstrate applications of the Procedures.

Who should attend?

Mechanical and Structural Engineers, Architects, Consultants and Designers involved in designing and building blocks of flats, Gas Transporters, Gas Suppliers, Meter Asset Managers, Gas Installers,
